

EDUCATION

New York University, College of Arts and Science (New York, NY) 2022 - 2026
Bachelor of Arts in Economics and Computer Science (GPA: 3.75)
• Dean's List for Academic Year (2022-2023; 2023-2024; 2024-2025)

Stanford University, Stanford School of Engineering (Online) Expected Oct 2026
Certificate of Achievement in Artificial Intelligence: Principles and Techniques

EXPERIENCE

Lingxi Games, Alibaba Group (Guangzhou, China), *AI Product Manager Intern* Jun 2026 - Present

- Designed the execution logic for an internal AI agent, defining how it retrieves knowledge, selects reusable skills, calls DingTalk MCP and data tools, sequences tasks, and validates results.
- Productized 20+ agent skills for advertising research, copywriting, game updates, player insights, and reporting by encoding expert SOPs, tool access, structured outputs, and quality checks.
- Built a production knowledge layer across 1,000+ business, marketing, and game-domain documents in Aone KBase, powering 12 production workflows; designed its OKF-inspired information architecture and maintained regression quality through recurring golden-question evaluation.
- Automated daily signal monitoring and weekly knowledge-base maintenance with cron jobs, Codex, CLI tooling, and reusable skills, reducing hands-on work from approximately 10 hours to 6 minutes per cycle.
- Automated Bilibili competitive-ad research, cutting a repeatedly tested production workflow from about 3 hours to 30 minutes while leaving interpretation and final decisions to the marketing team.
- Owned staged releases for about 10 pilot users, managed access, resolved sandbox and file-download failures, improved reliability, and trained marketing teams for a planned 200+ person rollout.

New York University Learning Center (New York, NY), *CS, Math & Accounting Tutor* Sep 2024 - Dec 2025

- Tutored students one-on-one in data structures, mathematics, and accounting, adapting explanations, coding exercises, and problem-solving strategies to individual learning needs.
- Led weekly study sessions, CS workshops, and exam reviews for about 110 students, reinforcing technical concepts, debugging approaches, and effective study practices.

Lingxi Games, Alibaba Group (Guangzhou, China), *Marketing Intern* Jun 2025 - Aug 2025

- Operated a company-owned [AIGC Douyin account](#), using generative AI to turn real-world user-protection stories into short-form content and growing the account to 660 followers in three weeks; contributed to a 9Game KOL campaign that lifted exposure UV by 9.55% and interaction UV by 11.56%.

Cypress Capital International Ltd. (Shanghai, China), *Summer Analyst* May 2023 - Aug 2023

- Supported due diligence and market research across logistics and EV batteries by drafting document checklists, synthesizing meeting findings, and presenting a one-hour CATL briefing to the investment committee.

PROJECTS

AI-Powered Randomized Meal Generator Nov 2024

- Built a full-stack application with React, JavaScript, Express, and MongoDB that generates recipes or restaurant recommendations from user preferences.
- Integrated Gemini, Google Maps, Google Places, and YouTube Data APIs to provide sourced results, restaurant details, and recipe videos.

SKILLS

Programming: Python, JavaScript, SQL, Java, C
AI & Agent Systems: AI agents, RAG, MCP, agent skills
Deployment & Operations: Docker, staged rollouts, access management, production debugging
Data & Automation: MaxCompute, MySQL, MongoDB, Selenium, BeautifulSoup, cron jobs
Web Development: React, Node.js, Express, Flask, REST APIs, HTML/CSS
Developer Tools: Git, Linux, pytest
